WHERE THE ROAD ENDS

HÄGGLUNDS
Rescue work, surveying, safari, transmission line maintenance, crew transportation, forest firefighting... these are just a few examples of the kind of transportation work which the Hägglunds Bv 206 all-terrain Carrier regularly performs in areas that roads don’t reach. Developed originally to meet the needs of the Swedish Defence Forces, the unique features of the Bv 206 quickly attracted a wide range of civil users. Superb off-road ability, minimal damage to the environment, excellent load-carrying capacity and high road speed are among the most appreciated quali-

Hägglund Bv 206 – for every kind of transportation work.
The versatility of this tough and versatile vehicle. New fields of use are constantly emerging. The ingenious basic design of the vehicle permits maximum flexibility, using a wide range of built-on and easily changed conversion units - for firefighting by foam or water, rescue operations with cutting equipment, hydraulic jacking, sawing, handling heavy loads with cranes or winches, coastal oil pollution control, ambulance duty, mobile medical service, etc. Contractors, local authorities and civil defence forces all find that efficiency improves with the Bv 206.
Where the road ends, the Bv 206 takes over

The Vehicle Division of AB Hägglund & Söner deploys advanced transportation technology, acquired during a long history as supplier to demanding operators. As far back as the 1920s, Hägglunds was already a recognised maker of busses. The current Hägglunds range, the result of intensive development work with the highest quality as a consistent aim, comprises rapid transit vehicles, locomotive bodies and street cars.

For close to 30 years, Hägglunds has also co-operated closely with the Swedish Defence Forces in the Design and construction of tracked vehicles, with quality and performance matched to stringent military specifications, including extreme off-road and amphibian capabilities. Deliveries of the internationally noted Bv 206 all-terrain Carrier, which are now in full swing, mark the latest phase in this development.
