

TRACK-TRUCK®

With HYSON® 100 kN or 200 kN static cone penetrometer

Features:

- Operates at highway speeds
- Terrain mobility
- Simple in operation
- Multifunctional applications like all our mobile CPT rigs

The unstoppable Track-Truck®

Bogging down a CPT-rig no longer exists

For over 30 years A.P. van den Berg has specialised in the design and manufacture of equipment for geo-technical and environmental in situ investigation based on the static cone penetration testing method (CPT). With the CPT method, special cones and soil sampling equipment can be pushed 50 meters (165 ft.) or more into the soil. The bearing capacity or contamination of the soil can be determined. The main obstacle for performing these tests is mobility on soft ground. Not however with our Track-Truck®.

*"Van den Berg
in
every field"*

The unique Track-Truck®

The A.P. van den Berg Track-Truck® is mobile where other heavy vehicles get stuck, thanks to the integrated track system. The Track-Truck® combines hydraulically driven tracks on the CPT-truck providing a unique mobile vehicle, at home on soft soil. By retracting the tracks, which are remotely controlled from the driver's cabin, the Track-Truck® runs as an ordinary truck on the highway.

A standard truck turned into a multifunctional bruiser

The track system is suitable for 4x4 or 6x6 off-road trucks and reduces the wheel load by 60 to 70%. Modified versions of the Track-Truck® can also be used as mobile drilling rigs, ambulances and field hospitals, mobile workshops, winch vehicles for cable-laying or mobile cranes. Steel or synthetic crawler plates can be used, depending on the application. With a 4x4 wheel configuration, the levelling jacks can even be eliminated.

Switch over to the Track-Truck®

The Track-Truck® drives on roads and terrains inaccessible to other vehicles. All of us at A.P. van den Berg would be pleased to provide more details about the many possibilities of our advanced Track-Truck®. We also have a demonstration on video, which you can view in your own office. Call, fax or E-mail us.

We reserve the right to change specifications without notice.

Tracks integrated in 6x6 vehicle.
