

this KID's no sissy

A new amphibious
all-terrain tractor to transport
your crew... and work for you
when they get there!

Forget weather and terrain, the KID's ready for work. The tough new KID will blaze your trail to that construction site, transport crews, and haul equipment. If the going gets sticky, just add tracks and give the KID webbed feet. The KID is eager to get to the job, and then go to work. ■ Prepare, level and oil a roadbed, clear underbrush, furnish on-site electricity or water from a nearby stream or lake, carry heavy loads through waterways, solve medium-duty load pulling problems ...

the KID and his component helpers will do these mansized jobs for you, and still have plenty of muscle left over for the other jobs you face daily. They are almost a complete construction crew in themselves. ■ This KID's no sissy. He's tough. Contact the factory for the dealer in your area.
