CO-OPERATION DEVELOPMENT

Narvik Technology has developed a new, fully militarized tracked vehicle in co-operation with the armed forces in Norway.

The first series are sold for operation within the Norwegian Army.

FEATURES

- large payload
- good manoeuvrability and off-road capability
- a reliable drive-line
- easy maintainability
- a low life cycle cost
- a large, comfortable interior

MULTIPLE OPERATION

The rear unit is fitted with a quick change attachment system for replacing platforms, hook-lifts, weapon launchers of various types or personnel transport cabins. The rear unit can also be equipped with special shelters containing Command Centers, Antennas, Jamming Systems etc.
